In the *Color palette* menu, there are two tool panels which store colors. Think of the "Global color palette" as your entire yarn stash in the other room and the "Loom color palette" as the yarns you have on the table as you are warping the loom.

In your pattern, you are only able to use the color you have on the table. If you need more colors, you have to go to your stash in the other room ("Global color palette") to bring in more colors.

Use "Drag an drop" to adjust your Loom color palette.

In the Loom color palette, click on the color you want to use

Selected color with red border

Keep the "Loom color palette" opened to be able to change the selected color.

Base patterr

In the Edition Tools menu, there are a few functions for an advanced use.

blank the warr create an alternate warp 🙀 create a baltik base pattern 🙀 create a tri color base pattern 2/2 base 🛛 💭 3/2 base 4/4 base 🛛 🕅 random

Draw your pattern.

Click on a thread on the main window to set it to the selected color. You don't need to start from a blank pattern.

If you need to adjust the number of threads of your pattern, open the pattern parameters menu and use Width, wider or narrower.

Comment edition <> wider > < narrower ↔ Width: (-10)(-1) 27 (+1)(+10) \$ Height (-10)(-1) 8 (+1)(+10)

You can also use a right click on the upper threading bar, where you want to add or remove a thread

Set your comment in the pattern parameters menu
